## Reference letter

To Whom It May Concern:

Outstanding financial expertise, using the services of the Swiss Interim Controller was a game-changer in understanding the growth potential of Share.P from a bottom-up approach. The way that investors are looking at the financial papers is crucial, especially from a start-up perspective. The approach of the Swiss Interim Controller was a “hands-on” type, not just a theory with a finger-pointing way but real action!!! We can recommend those services as the best possible from the Swiss market perspective, especially from the internationalisation and growth focus of the company.

CEO and Founder  
  
Mateusz Wojdylo
